

Assignment 3 (due 1:00 PM on Nov 7)

Find one of the papers below and read it.

And, come up with one or a few questions that you want to ask of me about the paper (or somehow related to it). The questions, as many as possible, will be addressed in the class.

On academic entrepreneurship

1. Shibayama, S., Walsh J.P. & Baba, Y. (2012) Academic Entrepreneurship and Exchange of Scientific Resources: Material Transfer in Life and Materials Sciences in Japanese Universities. *American Sociological Review*, 77(5), 804-830.
2. Bercovitz, J., Feldman, M.P. (2008) Academic entrepreneurs: Organizational change at the individual level. *Organization Science* 19, 69-89.

On incentive for science

3. Butler, L. (2003) Explaining Australia's increased share of ISI publications - the effects of a funding formula based on publication counts. *Research Policy*, 32: 143-155.
4. Shibayama, S. & Baba, Y. (2015) Impact-Oriented Science Policies and Scientific Publication Practices: The Case of Life Sciences. *Research Policy*, 44(4): 936-950.

This assignment is meant to develop your interest for your project preparation, to facilitate your understanding about the topic, and to facilitate your learning in theories (and methodologies) in innovation studies. Understanding technical details is not our priority, but of course, you can study techniques if you are interested.

If you ask a “good” question, it is considered as a contribution to the class, and you will be given a bonus point in your grading. You don't have to ask many questions.

Submission

- Write the number of the paper you read and your question(s) in an email message
- Send it to the TA: sunkao1035@gmail.com
- By 1:00 PM on Nov 7
